Safety precautions

1. Important notice
   ● We pursue a policy of continuing improvement in design and performance of products. The right is therefore reserved to vary specifications without notice.
   ● We cannot anticipate every possible circumstance that might involve a potential hazard.
   ● No part of this manual can be reproduced without written permission.
   ● Signal words (DANGER, WARNING and CAUTION) are used to identify levels of hazard seriousness. Definitions for identifying hazard levels are provided below with their respective signal words.

      **DANGER**: Immediate hazards which WILL result in severe personal injury or death.

      **WARNING**: Hazards or unsafe practices which COULD result in severe personal injury or death.

      **CAUTION**: Hazards or unsafe practices which COULD result in minor personal injury or product or property damage.

      **NOTE**: Useful information for operation and/or maintenance.

   ● If you have any questions, contact your distributor or dealer.
   ● This manual should be considered as a permanent part of the air conditioning equipment and should remain with the air conditioning equipment.

2. Checking product
   ● Upon receiving this product, inspect it for any shipping damage. Claims for damage, either apparent or concealed, should be filed immediately with the shipping company.
   ● Check accessories are all included with the unit according to the accessories list.
   ● Check the model number, electrical characteristics (power supply, voltage and frequency) and accessories to determine if they are correct.
     The standard utilization of the unit shall be explained in this manual. Therefore, the utilization of the unit other than those indicated in this manual is not recommended.
   ● Follow local codes and regulations when installing it.
   ● Please contact your local agent, as the occasion arises.
     Our company disclaim all responsibility for changing the equipment without our company's written consent.
3. Safety precautions

**DANGER**

- Do not install the appliance by the user. Ask the dealer or authorized company to install it. Improper installation could cause damage by fire or electric shock.
- Perform the installation correctly referring to the installation manual. Incorrect installation could cause a personal injury due to fire, electric shock.
- Do not splash water on the appliance and do not touch it with wet hand. These products are equipped with electrical components, splashing water could cause serious electric shock or short-circuit.
- Must not touch or regulate safety device in the appliance. Otherwise serious accident may occur.
- Please be sure to cut off the main power supply before opening the panel to repair.
- Please use specify specifications cable. Firmly connected to the connection part of wire terminals, and avoid being shell. Do not apply wire stress to these parts. Otherwise it will cause fever or fire, etc.
- Install the appliance on the base that can support its weight. Otherwise it may cause injury in the event the appliance falls off the base.
- Connect with the electric supply after installation and check electric leakage.

**WARNING**

- Avoid the following places for installation where appliance trouble is liable to occur.
  - Places with an oily ambient.

  - Where there is high-frequency or wireless equipment. It will cause interference.
- Moisture or water flooding place. Once the water enters the inside of the remote control, electric shock or electronic parts failure may occur.
- Do not install the appliance or connect the wires before reading the manual.
- Prohibit within the scope of 1 meter of the appliance using spray, such as pesticides, paint, hair gel or other toxic gases.
- If the ELB (Electric Leakage Break) or fuse trouble is liable to occur, please consult local service shop.
- Installation and wiring work should be perform according to the manual. Otherwise electric shock or fire may occur.
- Do not ride or place the object that with no relation with the appliance on the unit.
- Protect the wires, electrical parts, etc. from rats or other small animals. If not protected, rats may gnaw at unprotected parts and at the worst, a fire will occur.
- Firmly connect wires. Excessive force may cause fire.
- If the electric box or fuse break is liable to occur, please consult local service shop.

**CAUTION**

- Install indoor unit, outdoor unit, wire remote controller or cables at least 3 meters away from high-frequency source (such as medical appliance).
- Do not trample products or place anything on it.
- Choose a place as described below to install wire remote controller in order to let TEM. sensor work normally.
  - A. A place where average temperature in the room can be detected.
  - B. A place where is not exposed to direct sunlight.
  - C. Avoid extremely hot or cold locations.
- Do not play with the wire remote controller.
Wire remote controller

Parts names
Wire Remote Controller Introduction (Part Name)

1. **ON/OFF BUTTON**
The appliance will be started when it is energized or will be stopped when it is in operation, if you press this button.

2. **RUN INDICATOR**
Indicates that the appliance is on.

3. **MODE BUTTON**
Press this button to select the operation mode.

4. **FAN BUTTON**
Used to select fan speed in sequence low-medium-high- auto-low.

5. **SWING BUTTON** (invalid for some models)
Used to stop or start adjustment louver swinging and set the desired airflow direction.

6. **TIMER/CLOCK BUTTON**
Used to set the current time or set timer on/off.

7. **SLEEP BUTTON**
Used to set or cancel Sleep Mode operation.

8. **ENTER BUTTON**
Used to confirm settings.

9. **CANCEL BUTTON**
Used to cancel settings.

10. **ADD.FUNC. BUTTON**
Used to set filter clean, hot water, fresh air, electric heater, etc.

11. **INCREASE SETTING BUTTON**
Used to raise the set temperature;
It changes the TIMER ON/OFF settings and WEEKLY TIMER settings.

12. **DECREASE SETTING BUTTON**
Used to lower the set temperature;
It changes the TIMER ON/OFF settings and WEEKLY TIMER settings.

13. **LIQUID CRYSTAL DISPLAY (LCD) SCREEN**
Used to display indicator screens.
Wire Remote Controller Introduction (Part Name)
